

## **Technol 403 Diesel Fuel Improver with Cetane**

**Technol 403** is a premium warm weather diesel fuel improver and Conditioner designed to raise Cetane level, improve fuel lubricity, increase fuel combustibility, and clean the fuel system.

This improves horsepower and torque output, fuel and engine efficiency, both increase economy while reducing fuel related maintenance costs and downtime.

**Low Sulfur Diesel Fuel** is good for the environment, but puts at risk the lubrication properties of the fuel. The only source of lubrication for Injectors and the fuel injection pump is the fuel that flows through it. When sulfur and various other components are reduced to produce low sulfur diesel fuel, the results are a substantial reduction in the natural lubricating properties of the fuel itself.

**Technol Diesel Conditioners** have been tested and the results show an increase in fuel lubricity of 12½% (Ball On Cylinder Lubricity Evaluator - B.O.C.L.E.). This extends component service life and lowering maintenance costs and downtime.

**Improve the fuel** - Cetane enhancers raise the Cetane level up 3 to 6 numbers enabling faster fuel ignition, while Combustion Improvers provide for a more complete fuel burn, both working together, enable fuel to ignite sooner for a longer, hotter, and more complete fuel burn. This increases available horsepower, torque, and fuel economy savings while reducing or eliminating soot output and carbon build-up.

**Sludge Dispersants** break up and dissolve fuel sediment sludge small enough that most pass harmlessly through filters and injectors. This enables your fuel system to operate at peak efficiency with a properly atomized fuel spray.

A clean fuel system allows the engine to produce optimum horsepower, torque increasing economy.

Corrosion Inhibitors with continued use, virtually stop further fuel system corrosion from occurring.

### **Usage Directions**

Mixing Ratio = 1000 parts fuel/1 part Technol 403

Apply 1-8 oz bottle to 62 gallons (240 litres) of fuel.

Apply 1 gallon Technol 403 to 1,000 gallons of fuel.( 4 litres/ 4000 Litres)

Sunshine Maritime Ltd, 68, Morley St, London. SE1 7QZ Tel/Fax: 0870 240 6275
